

FIG. 1

FIG. 2

FIG. 3

FIG. 4

FIG. 5

A diagram of a rectangular block with two holes, A and B, on its front face. Hole A is a circular hole, and hole B is a rectangular hole. A light ray is shown entering hole A from the left, passing through the block, and exiting hole B on the right. The light ray is represented by a line with an arrow pointing to the right. The block is labeled with 'A' and 'B' on the left side, with lines pointing to the respective holes.
